Proyecto Valle de Naco

Catalog Number: 37B/43-67 Substance: ceramic Lot Number: 37B/43  
 Cat #: 37B/43-67 Object: censer frag.  
 Cat by: 24  
 Drawn by: 19

Full Description: rim

Paste Group: C

Form:

modeled censer fragment

Thickness:

Height: 8cm

Width: 2.7cm

inner rim Diameter: 13.4cm

RIM FORM: XVIII with rim drop connected to wall

Handle width:

Handle thickness:

Verbal Description:

This modeled censer fragment is composed of a tan paste with white inclusions. The fragment is a rim <sup>with a rim drop</sup>. The top of the rim has a square dot row separated by incisions. There are 14 dots on the rim. The width of the rim is 3.7cm. On the fragment body <sup>on</sup> below the rim there are six vertical lines of three applied dots. These lines are set 1.7cm apart. The left side of the body is burned. Below the dots an incised design flares out. It is a series of strikes - two diagonal strikes 1.5cm long slanting up to each other sandwiched between two vertical strikes 1.8cm long. There is a variation in the incised design to the right where there are two sets of diagonal strikes next to each other. From the side, the top of the sherd is beveled - walls are .7cm thick. The hole is 1.7cm wide and 3.7cm tall. The bottom wall is .9cm thick. The top wall is 1.5cm thick. The inside of the fragment (the back of the sherd) is highly burned. There is no paint or slip.
